**WE FORGE QUALITY  
FOR A BETTER TOMORROW**

# About us

**RR Industries** (An ISO 9001:2015 Certified Unit) was incorporated in 1994 as one of the leading manufacturers of RDSO approved railway track components in India. The company manufacture Elastic Rail clips & Grooved Rubber sole plates for Railways and forging of metal parts to cater industries like Automobile, Electric power Located in Meerut on Delhi Road, UP (NCR), the company holds the manufacturing capacity of 3600 MT per annum of Forgings. The vertically incorporated arrangement of the organization has all the processes under one roof beginning from metal cutting to final packaging which includes, Tool Room for Manufacturing of Dies and Tools, Forge Shop, Heat Treatment, precision machining of Forged Components. The company's Rubber Moulding Division provides a comprehensive range of press molded rubber products for a wide range of applications. The company has state of art facility and all other required capabilities to meet the requirements of our customers.

## Mission

RR Industries endeavors to accomplish excellence in serving clients through persistent improvement and aggressively pursue new business determined to add value for our customers with determination and a positive approach. Our aim is to forge lasting relationships with customers based on consistent performance

## Vision

We strive to be recognized globally as leading and constantly growing force in forging industry and to be appreciated for our business values and trust in our customers.

# Facility

## Forge shop

Our state of art manufacturing facility enables us to meet the bulk requirements of variety of product range of standard as well as customized profile forged products on our machines as mentioned below,

1. Friction screw press
2. Power press
3. Trimming Press

With above-mentioned forging facility our aim is to increase the yield & productivity and make the customers delighted by supplying the quality materials like carbon steel, stainless steel, alloy steel with on time deliveries.

# Heat Treatment

Heat treatment is a special process which plays a vital role to enhance the physical properties as well as to make the excellent quality of materials meeting the standards. Considering this our facility is well equipped with heat treatment furnace for carrying out operation like Annealing, Normalizing, Hardening, quenching and tempering.

# Plant & Machinery

We have world class machining facilities that can satisfy all the prerequisites of the customers with accuracy and precision.

Our infrastructure incorporates special purpose and general purpose cnc turning centers, special purpose drills machines to handle simple and complex machining parts to precises dimensions.

## Rubber Moulding

Our company's rubber molding facility consists of machinery ranging from Moulding press, Kneader, mixing mill, Extruder with full testing lab comprising of Ageing Oven, Tensile testing, Tension set, Compression Hardness tester (Shore A), Deflection test, Specific gravity, Ash content.

With this facility we are able to serve our customers in different industry with high quality rubber molded parts as per their requirement.

# OUR PRODUCT

## Automobile

**Boss center TVS**

**Boss center MAHINDRA**

**Boss center YAMAHA**

**Boss center SUZUKI**

**Boss center SUZUKI**

**Boss center HONDA**

**Boss center HONDA**

**FLYWHEEL HUB**

**Fork shift**

**Fork shift**

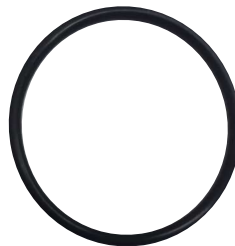

## Railway

**Grooved rubber pad**

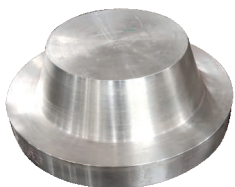

**Elastic rail clip**

**O ring**

## Silicon rubber

## Other profile forgings

Guaranteed satisfaction for all customers  
through best quality control system  
and on time deliveries.
